

Change Location of Page Numbers

Jonathan Dreyer

IMPORANT NOTE:

Check the formatting guidelines of your institution before changing the position of the page numbers.

1. Using a text editor (Notepad (Windows) or TextEdit (Mac OS)) open *ucthesisLyx.cls* located in the *ucthesisLyx* folder of the MiKTEX program directory

On Windows

..\MiKTEX x.x\tex\latex\ucthesisLyx\ucthesisLyx.cls where x.x is the MiKTEX version installed.

On Mac OS

/Library/texmf/tex/latex/ucthesisLyx/ucthesisLyx.cls

2. The location of the page numbers is set at lines **1317** to **1322** in *ucthesisLyx.cls*

% Definition of 'plain' page style.

%

```
\def\ps@plain{\let\@mkboth\markboth
```

```
\def\@oddfont{}\def\@evenfont{}
```

% no feet

```
\def\@oddhead{\hbox{}}\hfil\rmfamily\thepage}
```

% heading (right)

```
\def\@evenhead{\rmfamily\thepage\hfil\hbox{}}}
```

% heading (left)

3. To move the page numbers to the **lower right** replace the original code with the following:

% Definition of 'plain' page style.

% Page numbers lower right

```
\def\ps@plain{\let\@mkboth\markboth
```

```
\def\@oddfont{\hbox{}}\hfil\rmfamily\thepage}
```

```
\def\@evenfont{\rmfamily\thepage\hfil\hbox{}}}
```

```
\def\@oddhead{}
```

```
\def\@evenhead{}}
```

For page numbers **centered at the bottom** of the page replace the original code with the following:

% Definition of 'plain' page style.

% Page numbers lower middle

```
\def\ps@plain{\let\@mkboth\markboth
```

```
\def\@oddfont{\hbox{}}\hfil\rmfamily\thepage\hfil }
```

```
\def\@evenfont{\rmfamily\thepage\hfil\hbox{}}}
```

```
\def\@oddhead{}
```

```
\def\@evenhead{}}
```

4. Save and close *ucthesisLyx.cls*. Restart LyX.
